Getting to know us...

Welcome to CJ Electrical Solutions. I am extremely proud to have watched our business develop and grow over the past few years, into the dynamic, trusted EV charging installation and maintenance business we are today.

Please allow Victoria and her CJ Electrical Solutions team to guide you seamlessly through your EV charging strategy knowing your business is in highly experienced, professional and very safe hands.

Chris Langford - Company Chairman

Our team are very passionate about delivering a reliable and effective charging infrastructure for your specific needs. This is what drives us. We always strive for excellence and innovative thinking in everything we do and continuously ensure exceptional delivery, added value and maximum return on your valuable investment.

Delivering Excellence

What's important to us...

Our Mission...

To create a cleaner, greener future, where businesses can easily and seamlessly evolve to a more sustainable, zero emissions transportation network.

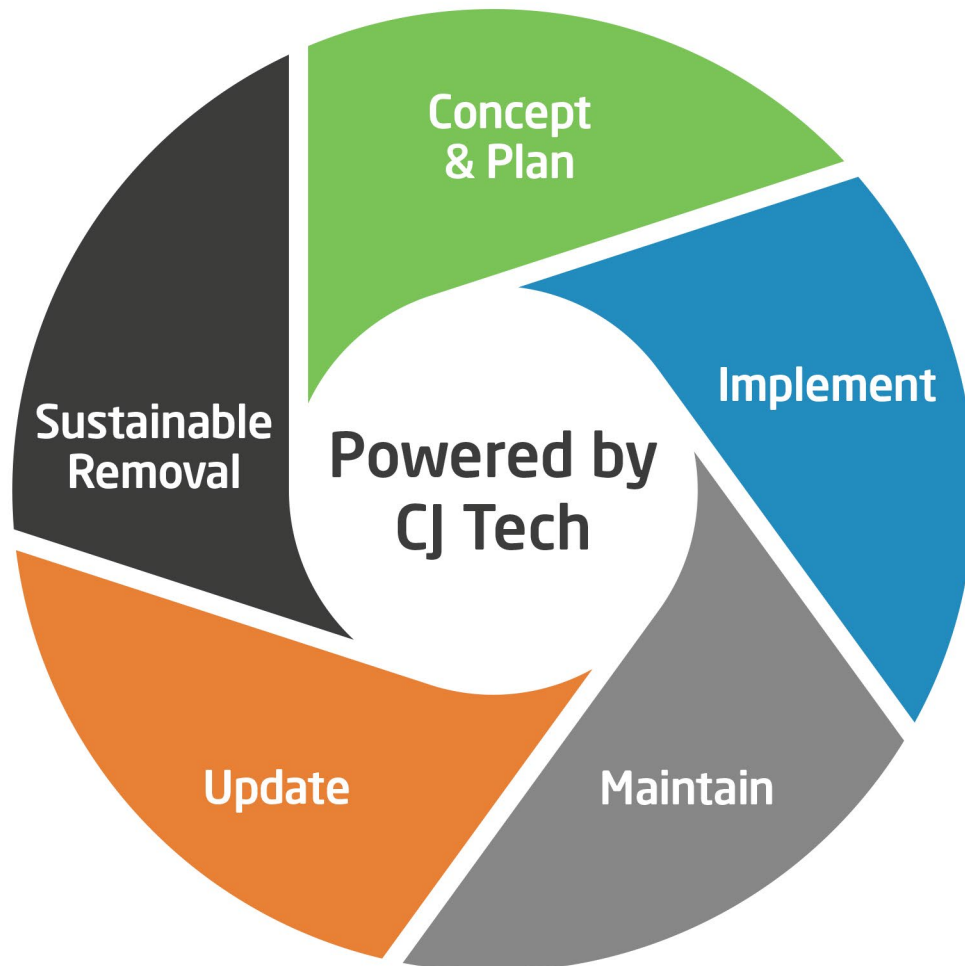

Our Ambition...

To become your trusted, 'go to' Partner.

As a leading provider of electric vehicle (EV) charging infrastructure, we are dedicated to empowering businesses, municipalities, and organisations to embrace the electrification revolution. Through our comprehensive services and expertise, we can install both AC and DC equipment and are also fully accredited to work on petrol forecourts.

Why Choose CJ Electrical Solutions

A partner to our clients throughout the entire cycle, every step of the way, whenever you need us...

We Advise...

Our project team are always happy to help and can advise on available **GRANTS** and **FUNDING** opportunities. These can significantly offset the cost of EV charging installations. Examples of grants you may be eligible for:

Workplace Charging Scheme
Infrastructure Grants
Renewable Energy Incentives
Finance Options

We Bring...

Expertise and Experience:

With years of industry experience, we have the knowledge and expertise to deliver top-quality EV charging installations. Our team of professionals will guide you through every step of the process, ensuring a customized solution that meets your unique needs.

Comprehensive Services:

From initial consultation and site assessment to design, installation, and ongoing maintenance, we provide end-to-end solutions for EV charging infrastructure. We can also design and print your signage, organise bay markings and manage any groundwork requirements.

Cutting-Edge Technology:

We partner with leading manufacturers to provide state-of-the-art charging equipment that is reliable, efficient, and user-friendly. Our charging stations are compatible with all major EV models and feature advanced functionalities such as fast charging, smart energy management, and a smooth integration with renewable energy sources.

Delivering Excellence

We Can...

We have the experience and capability to install EV charging stations in a wide range of locations, including:

Workplace Charging:

Enhance employee satisfaction and attract top talent by offering convenient charging solutions at your workplace.

Retail Centres:

Increase foot traffic and customer loyalty by providing EV charging amenities in shopping centres and other retail outlets.

Hospitality:

Cater to the needs of EV-driving guests and visitors with charging stations at hotels, resorts, and parking facilities.

Fleet Charging:

Streamline your fleet operations by implementing efficient and reliable charging infrastructure for electric vehicles.

Public Spaces:

Contribute to a cleaner environment and support sustainable transportation by installing charging stations in public areas and carparks.

Residential Communities:

Provide residents with the convenience of home charging stations, promoting EV adoption within your community.

Delivering Excellence

The Complete Solution..

Tailored to your EV Charging Needs

Consultation and Design:

Our team will work closely with you to understand your charging requirements, assess your facility, and develop a customized charging solution. We consider factors such as infrastructure layout, electrical capacity, future scalability and user convenience. We will also ensure you are fully aware of any grants and funding options.

Installation and Integration:

Our skilled technicians will handle the installation process, ensuring compliance with industry standards and local regulations. We seamlessly integrate the charging infrastructure with your existing electrical system, providing a reliable and efficient charging experience.

Smart Energy Management:

We incorporate advanced energy management systems into our solutions to optimize charging schedules, load balancing, and integration with renewable energy sources. This maximizes the efficiency of your charging infrastructure, reduces operating costs, and supports sustainability initiatives.

Maintenance and Support:

Our commitment to your success doesn't end with installation. We provide comprehensive maintenance and support services to ensure the long-term performance of your charging infrastructure. Our proactive monitoring and rapid reactive maintenance help minimize downtime and keep your charging stations running smoothly.

Sustainable Removal:

When the time comes to update or replace your charging units, we provide a sustainable approach to this important procedure. By following our reduce, reuse, recycle and repurpose process, we minimise the environmental impact and ensure as little as possible is sent to landfill.

Driven by Data.... Welcome to CJ Tech

Another thing that sets us apart from other companies is our advanced management framework (Back office system) that precisely plans, organises, coordinates and controls your EV charger installation project. It offers scalability, transparency, ease of use and can adapt to rapidly evolving charger requirements.

As our client partner you will have full access to the CJ Tech management system via a client portal, which gives you everything you need in one place, plus all the data you desire to make informed decisions about your EV charging strategy.

Need photos, certificates, schedules, load balancing, individual vehicle energy consumption, or just about anything EV charger related... **CJ Tech can help with that.**

Investing in our Team - introducing CJ's Training Academy...

We are extremely proud of our on-site, purpose-built Training Academy. This facility is equipped with the latest EV charging equipment and technology, providing a dynamic and modern environment for research, innovation and training.

This learning hub ensures all our engineers have access to training resources, expert guidance, practical and classroom based support and the ability to collaborate and exchange ideas to drive operational success.

By continuously investing in our team, we strive to deliver excellence in every project we undertake and gives us the ability to quickly adapt to the ever changing EV charging landscape.

Committed to Sustainability

We are as committed to meeting our own environmental targets as we are to helping our clients meet theirs.

A few of our initiatives to reduce our carbon footprint

-  Increasing our zero emissions vehicle fleet
-  Introduced scheduling technology, hybrid working and bike to work scheme, to reduce business miles
-  Support carbon offsetting by partnering with 'Just One Tree'
-  Ecovardis Silver award

Let us support you in your transition to a zero emissions vehicle fleet by providing the infrastructure you'll need to achieve this environmental goal

Need more convincing to Embrace Electric Mobility....

By investing in EV charging infrastructure you will:

Environmental Responsibility:

Help reduce greenhouse gases and promote a cleaner, healthier environment. Join the sustainable transportation revolution and showcase your commitment to corporate social responsibility.

Enhanced Employee Satisfaction:

Attract and retain top talent and also enhance employee satisfaction. By offering workplace charging, you will empower your employees to embrace electric mobility.

Future-Proofing Your Business:

Ensure you stay ahead of the curve with the increasing demand for EV charging infrastructure. Invest now and take a proactive step towards your sustainability targets.

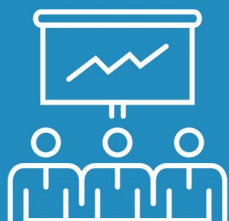

Attract and Retain Customers:

Attract a growing demographic of eco-conscious customers who drive EVs, encourage their patronage and foster customer loyalty.

Increase Foot Traffic and Dwell Time:

Drive footfall at commercial areas such as shopping centres, restaurants and retail establishments. EV drivers actively seek out charging stations, and while their vehicle charges, they have more time to explore and engage with your business.

Create Revenue from your EV Chargers:

Generate revenue by offering 'paid' charging services to both customers and the general public. This creates an additional revenue stream while providing a valuable service to EV owners.
